## What do Average Progress Scores mean?

Most schools will have progress scores between  $-5$  and  $+5$ . If a school has a progress score of  $0.0$  this means that on average their pupils achieved similar results at the end of KS2 (end of Year 6) to pupils in other schools with similar results at the end of KS1 (end of Year 2). If a school has a positive progress score this means that on average their pupils made more progress than pupils in other schools with similar results at the end of KS1.

For example: a score of  $+3$  in Reading would mean that on average pupils at the school got 3 scaled score points more in the KS2 English Reading test, compared to other pupils nationally with similar results at the end of KS1. A negative score does not mean a school has failed or pupils have made no progress. It just means that on average their pupils have made less progress than pupils in other schools with similar results at the end of KS1.

For example: a score of  $-4$  in Maths would mean that on average pupils at the school got 4 scaled score points fewer in the KS2 Maths test, compared to other pupils nationally with similar results at the end of KS1.
